

Part 2: Product Understanding & UX Analysis Report

Candidate: Aditya Kumar | **Role:** Full Stack Developer (Fresher)

Live Deployed URL: <https://ablespaceassismment.netlify.app/>

1. Executive Summary

AbleSpace is a specialized Special Education (SpEd) management platform engineered for Special Education Teachers, Speech-Language Pathologists (SLPs), Occupational Therapists (OTs), and Behavior Specialists (BCBAs). The platform streamlines IEP goal tracking, caseload management, data collection, and compliance reporting.

The **"Take Data"** button on the **Caseload** tab serves as the primary operational entry point for practitioners entering instructional or therapy sessions with students.

2. Interface & Workflow Breakdown

2.1 The Caseload Roster Interface

As shown in the screenshot below from the AbleSpace platform, the Caseload roster presents student profiles, IEP due dates, evaluation due dates, multidisciplinary team collaborators, and allocated service times:

☐	Full Name	Last Name	IEP Due	Eval Due	Collaborators	Service Time	School	Actions
☐	Demo Student1	Student1	11/06/2024	03/25/2020	J E +1	OT - 30mins/Wk	Demo School 1	Take Data
☐	Demo Student2	Student2	03/02/2020	02/28/2020	J C +3	OT - 30mins/Wk, Spe	Demo School2	Take Data
☐	Max Planck	Planck	09/06/2024	-	J M +3	30 Mins/Week		Take Data
☐	Albert Einstein	Einstein	09/19/2024	-	J C +4	0		Take Data
☐	Tim David	David	09/19/2024	-	J J +3	0		Take Data
☐	Charles Darwin	Darwin	-	-	J J +3	0		Take Data
☐	Marie Curie	Curie	-	-	J A +3	0		Take Data
☐	Dwight Schrute	Schrute	-	-	C A +1	0		Take Data

2.2 The "Take Data" Session Workflow

3. UX/UI & Functional Improvement Recommendations

- 💡 1. One-Handed Mobile / Tablet Touch Mode: High-contrast touch targets (>60px) for single-tap trial tallying on iPads/tablets.
- 💡 2. Group Session View (Simultaneous Multi-Student Logging): Side-by-side mini data cards for up to 4 students on one screen.

-  **3. Voice-Assisted Hands-Free Data Entry:** Web Speech API voice commands for hands-free trial recording during physical/sensory therapy blocks.
-  **4. Offline-First Local Data Persistence:** IndexedDB sync queue ensuring session data is never lost during school Wi-Fi outages.
-  **5. Real-Time IEP Mastery Notifications:** Instant visual micro-banners celebrating goal mastery thresholds during active data entry.

4. Summary Matrix

ID	Feature Proposal	Primary User Value	Complexity
IMP-1	One-Handed Quick Data Mode	Faster trial logging during active instruction	Low (UI Layout)
IMP-2	Multi-Student Group View	Eliminates context switching in group therapy	Medium (State Management)
IMP-3	Voice-Assisted Entry	Hands-free data logging during physical therapy	Medium (Web Speech API)
IMP-4	Offline-First Sync Queue	Prevents session data loss during Wi-Fi drops	Medium (IndexedDB)
IMP-5	Real-Time Mastery Banners	Immediate IEP milestone feedback	Low (Threshold Calculation)
